### What do you feel are the most important qualities/characteristics in today's workplace?

The most important qualities and characteristics in today's workplace are uncompromised ethics, a "can-do" attitude and a willingness to continue to learn, improve and to change to fit your job's needs.

### More about me:

## Flint Hills Resources Community Action Council

---

Was raised in San Antonio, Texas and moved to the Corpus Christi area to attend University, work and enjoy the outdoors. I have a strong belief that people can impact the balance of nature and all should be involved in reducing the negative impact wherever possible. I believe that we should leave something for the next generation to enjoy, i.e clean water, clean beaches and parks and clean air. Married and raised 2 children in Corpus Christi.
